

HUNTERSCIENTIFIC

PASTEUR PIPETTES

for IVF Procedures

Non cotton fibre free plugs.

Uniquely fire polished tip

Company overview

Hunter Scientific is a specialist supplier to the IVF market, and a major manufacturer of Pasteur pipettes. Our products have been developed in collaboration with leading practitioners in the UK.

Hunter Scientific are distributors for a wide range of laboratory equipment and consumables designed for Assisted Conception.

Quality Systems

Hunter Scientific maintains the highest standards for all manufactured and distributed products.

Hunter Scientific is registered to ISO 13485:2016. All Hunter Scientific manufactured Pasteur pipettes are produced as Class IIa Medical Devices. They are validated for use under Medical Device Directive 93/42/EEC.

Hunter Scientific manufacture CE marked products and have a positive, pro-active approach to working with end users to continuously improve the quality of products in both performance and certification.

100 pipettes per box
20 pouches of 5

100% quality inspection.

Sterile Pasteur pipettes for IVF procedures

Hunter Scientific conforms to Medical Device Regulations, which enables us to apply the CE mark as a Class IIa Medical Device.

All our Pasteur pipettes undergo a rigorous multi-stage washing process. Pasteur's are dried, 100% inspected and then sterilised.

A special non-cotton material is used for the plugged versions, which avoids cotton or fibre contamination.

All Pasteur pipettes are supplied with uniquely fire polished tips and toxicity tested.

The pipettes are packed in pouches of 5. A sturdy outer shipping box ensures safe transportation and storage. Identifiable by a blue box for Borosilicate glass and a green box for Soda glass.

As a holder of ISO 13485:2016 QMS, we are regularly audited both internally and externally.

- Consistent quality
- Independently laboratory tested

- Mouse Embryo Assay (MEA)
- Human Sperm Motility Assay (HSMA)
- Limulus Amebocyte Lysate (LAL)
- Non-cotton plug avoids fibre drop
- Uniquely fire polished tip
- Tamper evident Seal
- 100% inspection at each stage of manufacture
- Superior primary & secondary packaging
